

Web Developer

Description:

We currently have an opening for a results-oriented **Web Developer** with a background in highly secure financial transactions system and proven experience in program management.

The candidate must be a self-directed individual capable of translating marketing requirements into web based tools and products. He or she should work well on cross-functional development teams involving hardware, embedded software, application development and third party libraries and packages. Experience managing small teams that include internal and external resources is required. A 'make it happen' mentality and the ability to balance multiple projects and responsibilities is a must.

We offer an exciting work environment, competitive salary and a generous benefits package. If you meet our requirements below, we encourage you to send your resume and salary expectations today.

Requirements:

- 3+ years of web based development
- 4 Yr degree in Computer Science or equivalent
- Java 1.5
- Struts/JSP
- Database Architecture
- Linux
- Web page design
- PHP4.0
- Additional responsibilities:
 - Embedded development experience
 - C/C++ in Linux environments
 - Engineering administration & documentation control support

Location:

Atlanta, GA
